

The human soul in light of today's Science

Thinking coherently in a world of freedom

4th Session: 29. June 2006, 20:00 hrs

3rd Session: 15. June 2006, 20:00 hrs

2nd Session: 18. Mai 2006, 20:00 hrs

1st Session: 27. April 2006, 20:00 hrs

Direction: Antoine Suarez, Dr. sc. nat. ETHZ

Center for Quantum Philosophy, www.quantumphil.org

Institute for Interdisciplinary Studies, www.embryoperson.org

In the workshop we will mainly discuss the following issues:

- How do the others know that I have a soul?
- Is there a place for free will and spiritual soul in today's science?
- Do animals have souls?
- When does a human person die? (When does the soul leave the organism? The clinical criteria of death)
- When does a human person begin to exist? (When does the ensoulment occur?)
- Does the embryo's moral status depend on implantation? The relevance of epigenetic information
- Distinguishing between a sick embryo and a pseudo-embryo.
